Satellite Communication

Key Benefits for Organizations

Better Employee Safety

Help staff feel confident and safe while working alone or in risky situations. This contributes to higher staff retention and employee satisfaction.

Compliance & Risk Mitigation

We make it easy to prove worker safety regulatory compliance and protect against financial risk after a serious incident occurs.

Faster, More Coordinated Response

Alert systems and monitoring tools help minimize response time during an emergency, increasing the probability of a positive resolution.

Improve Safety Program ROI

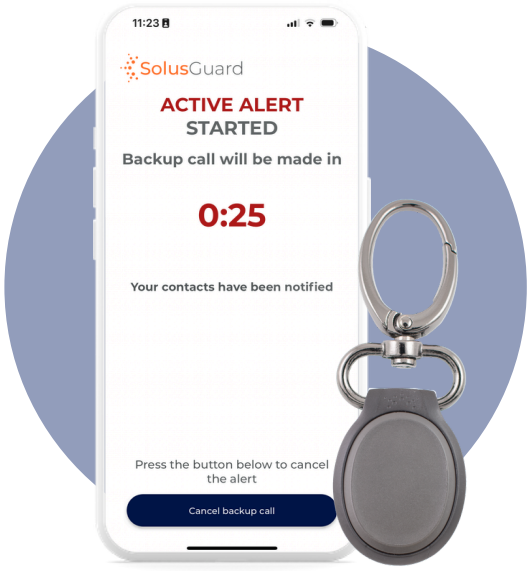

We improve worker safety program efficiency and reliability, helping reduce operational costs and increase program compliance amongst staff.

Wearable Panic Button

Developed for people who work alone in the riskiest of situations, the SolusGuard wearable panic button provides the fastest and most reliable way to signal for help during an emergency.

Key Features

Small & Discrete Wearable Device

Measuring 3.5 cm X 2.8 cm, we provide one of the smallest BlueTooth panic buttons on the market that can be worn multiple ways.

Notify Multiple People of an Emergency Simultaneously

Our panic button allows the wearer to alert co-workers, supervisors and monitoring agents simultaneously through multiple channels.

Automatic Call Placement to 911

Our patented backup call technology allows the panic button to place a 911 call through the wearers phone.

Configurable Sound and Alert Settings

Choose audible or silent alarm modes, who's alerted, the dialed number, and more. Our button adapts to your organization's precise safety protocols

Benefits of a Wearable Panic Button

Maximize protection for your most at-risk staff by providing a wearable emergency notification device.

Prevent against escalating tense situations by allowing staff to discretely signal for help.

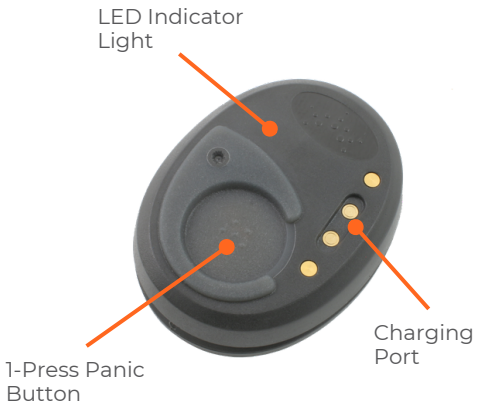

Decrease response time during emergencies by notifying several people with the press of a button.

Full Feature List

Single-press alerts sent to an unlimited number of contacts and/or monitoring agencies	✓
Automatic live backup call to 9-1-1 even if the mobile app is closed	✓
GPS location, employee name, and additional information included with alert details	✓
Silent or audible alarm	✓
Button vibration when pressed to indicate the device is in alert mode	✓
Recessed button design to protect against accidental presses	✓
Rechargable battery with approximately 72 hours of battery life	✓
LED indicator lights to signal proper phone connection, alert mode, and low battery	✓
Two device holder options allowing it to be clipped onto clothing or worn as a necklace	✓
Battery level and connection status indicators via the smartphone app	✓

Device & Holders

Breakaway Pendant Necklace Holder

Mobile Safety Application

Designed for people who work alone or in unpredictable environments, the SolusGuard mobile safety app turns a smartphone into a powerful employee safety tool.

Key Features

Check-in & Location Sharing

Start a timer during periods of at-risk work to share your location and notify others if you haven't checked in.

SOS Emergency Alert Button

Tap the SOS button to send an instant alert, along with real-time GPS coordinates, to a network of contacts.

Alert Notification & Communication System

Each employee can setup a network of contacts who will be notified when a check-in is missed or SOS alert is triggered.

Satellite & Wearable Panic Button Options

Extend the capabilities of the mobile safety app with our fully integrated satellite extender or wearable panic button devices.

Benefits of a Mobile Safety App

Help staff feel more confident and safe while working alone or in high-risk situations.

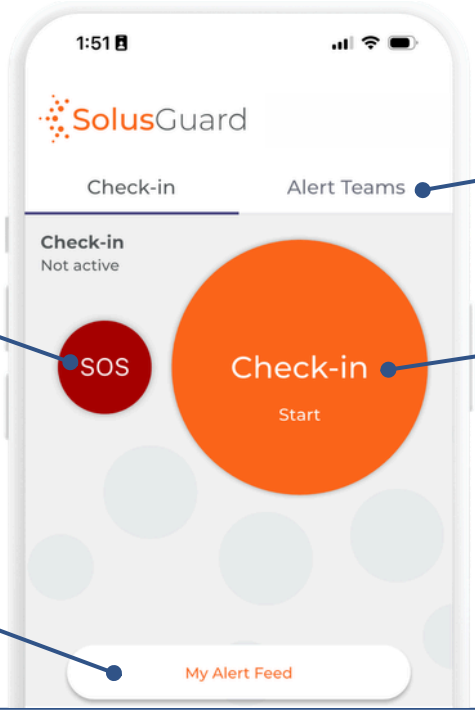

Enhance the simplicity, efficiency and reliability of regular staff check-ins with an app-based process.

Notify other staff of a potential emergency even if you can't get to your phone with a timer-based alerts.

Full Feature List

Customizable check-in time limits	✓
Web-based check-in tool for advanced scheduling	✓
Push notification reminders to end or extend their check-in for alert prevention	✓
Real-time location sharing with managers during active check-ins	✓
Two distinct alert types, missed check-in and SOS	✓
Alerts contain GPS location, employee name, time of alert, and additional details	✓
Multiple alert monitoring options including internal or our professional 24/7 monitoring	✓
Ability to customize who receives alerts for each individual employee	✓
Available for both iOS or Android smartphones	✓
Satellite extender or wearable panic button add-ons for better connectivity and safety	✓

App Navigation

Alert Teams tab to view alerts from others who have added you as an emergency contact.

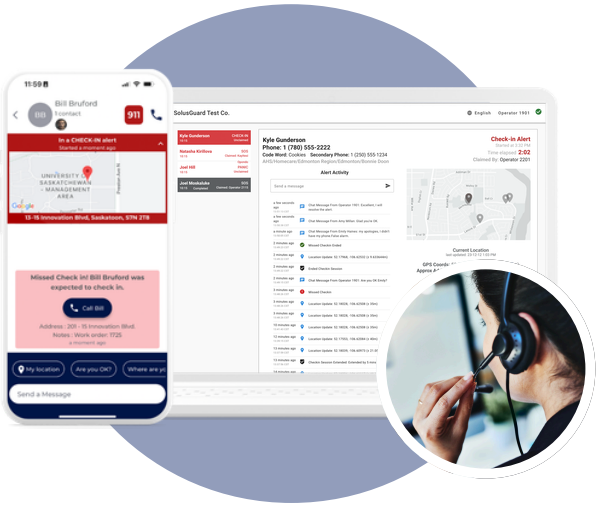

SOS button to instantly send emergency alerts to your contact network.

Check-in button to start a timer and alert others if you don't check-in before the timer expires.

My Alert Feed to communicate with your contact network during an emergency.

Alert System & Monitoring

SolusGuard ensures staff alerts are handled swiftly, providing first responders and internal teams with critical information — such as employee details, precise GPS location, and the nature of the alert — right when it's needed most.

Key Features

App or Wearable Alert Device for Staff

Equip staff with our safety app and/or panic buttons to trigger alert notifications when they miss a check-in or press the SOS/panic button.

Mobile-based Alert Monitoring

Receive alert notifications, details and coordinate your response on the go through our mobile safety app.

Web-based Alert Monitoring (Optional)

Enable your internal monitoring staff to receive alert notifications, triage alerts, and coordinate response efforts from their desktop computer.

Professional 24/7 Monitoring (Optional)

Our dedicated agents are available around the clock to respond to employee alerts, follow your alert escalation protocol, and dispatch emergency services as needed.

Benefits of our Alert System

Help staff feel safe with immediate response from monitoring agents or managers when they trigger an alert.

Customize the alert monitoring options for each group of staff based on level of risk, ensuring you only pay for what you need.

Maximize emergency response speed and coordination with our alert feed that enables group communication after an alert is triggered.

Full Feature List

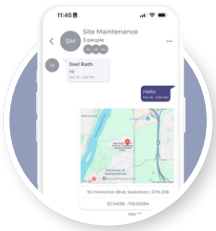

Multi-channel alert notification capabilities including push notification, SMS, email and API integrations	✓
One-to-many alert notification system enabling staff to notify multiple people simultaneously within seconds of starting and alert	✓
Alert messaging feed. Lets all alert recipients communicate, coordinate, and stay informed during an incident.	✓
Alerts contain GPS location, employee name, time of alert, and additional details previously entered by the employee.	✓
Three distinct alert types including missed check-in, SOS and panic (staff must be equipped with a wearable panic button device to trigger a panic alert)	✓
Ability to customize who receives alerts for each individual employee	✓
Choose from one or multiple alert monitoring tools (mobile app, web app, or professional)	✓
Automated alert documentation and incident reporting tools	✓
Two alert tool options for staff: Mobile Safety App and/or our Wearable Panic Button	✓

Satellite Communication

When staff operate in off-grid locations, maintaining a reliable safety communication system is critical. SolusGuard's satellite extenders pair with our mobile safety app to ensure every team member remains secure and connected — even beyond cellular range.

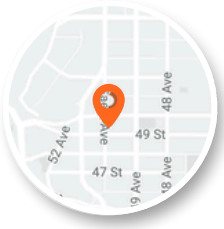

Key Features

Direct & Group Text Messaging

All employees can communicate with each other through the same mobile app regardless of location.

Check-ins & Alerts with Precise Location

Staff can continue using the safety app to complete regular check-ins and send alerts that include latitude and longitude coordinates.

Automatic Network Transitioning

Our app will automatically transition between cellular and satellite connectivity depending on signal strength - maximizing performance when traveling.

Rugged and Reliable Satellite Devices

Waterproof, dustproof, freeze-resistant, and up to 120 hours of battery life — keeping your workforce reliably connected even in extreme environments.

Benefits of our Satellite Communication Solution

Help staff feel more confident and safe while working in isolated environments without cellular service or internet.

Create protocol consistency within your worker safety programs by allowing all staff to follow the same processes regardless of location.

Improve emergency response coordination in remote locations by enabling communication between responders and off-grid staff.

Satellite Extender Device Feature Comparison

SolusGuard offers two different Satellite Extenders, the ACR Bivy Stick and the Solara Flare. Both satellite extenders integrate with the SolusGuard app and services in the exact same way, but the different hardware offers slightly different features.

	ACR Bivy Stick	Solara Flare
Device dimensions (height X width X depth)	11.15 cm X 4.5 cm X 2.05cm	14.5 cm X 4.5 cm X 2.5 cm
Device weight	95 grams	180 grams
One-tap connection to the SolusGuard mobile safety app	YES	YES
Battery life	120 hours	120 hours
GoPro mount compatibility	YES	NO
Military-grade battery	NO	YES
USB charging port for charging other devices	NO	YES
Water and dust proof	YES	YES
Shock resistant	YES	YES
Manufacturing location	United States	Canada

Pricing Factors & Quotes

Pricing Made Simple

At SolusGuard, we believe safety solutions should be flexible, transparent, and tailored to your unique needs. That's why our pricing is customized based on what matters most to your organization.

What Affects Pricing?

Our pricing is influenced by three key factors:

- Number of users – How many people need access to safety tools
- Solutions selected – Panic buttons, check-in, and satellite
- Monitoring preferences – Mobile alerts, Command Center, or 24/7 professional monitoring

Let's Build Your Quote

Every organization is different. Once we understand what you need, we'll provide a clear, customized quote—no surprises. Visit our website (solusguard.com) and contact us so a member of our team can provide you with a quote. If you are unsure what solutions or monitoring options are best for your organization, visit our website and book a demo.

Implementation & Support

Implementation

We provide a variety of resources and services to help organizations ensure SolusGuard is implemented properly with their staff. This includes:

- Personal account setup
- Live virtual onboarding and training sessions for management
- Short eLearning courses for end user onboarding and training
- Implementation reports to monitor uptake
- Dedicated implementation manager for large-scale implementation projects

Support

Once you're up and running with SolusGuard, we continue to support usage of our products through:

- A comprehensive knowledge base with self-help articles
- Dedicated technical support agents that can be reached by email or phone during normal business hours
- Regular check-ins from your account manager
- Regular usage reports upon request
- Continues product updates and improvements

Why Choose SolusGuard

We are dedicated to assisting organizations in safeguarding their employees through innovative safety solutions. Companies across North America, with workforces ranging from 10 to 5,000 employees, trust SolusGuard because of our commitment to providing high-quality hardware, reliable technology, user-friendly products, personalized customer service, and our focus on finding the best solutions tailored to each organization we partner with.
