SolusGuard

Mobile Safety Application

Designed for people who work alone or in unpredictable environments, the SolusGuard mobile safety app turns a smartphone into a powerful employee safety tool.

Key Features

Check-in & Location Sharing

Start a timer during periods of at-risk work to share your location and alert others if you become unresponsive.

SOS Emergency Alert Button

Tap the SOS button to send an instant alert, along with real-time GPS coordinates, to your contact network.

Alert Notification & Communication System

Setup a network of contacts who will receive alerts and respond to alerts from others with in-app communication tools.

Automatic Fall Detection

Get alerted if one of your staff has a slip trip or fall. Also includes fully adjustable sensitivity to minimize false alerts.

Benefits of a Mobile Safety App

Help staff feel more confident and safe while working alone or in high-risk situations.

Enhance the simplicity, efficiency and reliability of regular staff check-ins with an app-based process.

Accurately locate staff and decrease response time during emergencies.

Ability to customize who receives alerts for each individual employee	✓
Available for both iOS or Android smartphones	✓
Satellite extender or wearable panic button add-ons for better connectivity and safety	✓

Pricing & Quotes

Our pricing is influenced by three key factors:

- Number of users – How many people need access to the mobile safety app
- Solutions selected – Mobile safety app only, panic buttons or satellite
- Monitoring preferences – Mobile alerts, Command Center (web-based), or 24/7 professional monitoring

Visit our website and contact us so a member of our team can provide you with a quote. If you are unsure what solutions or monitoring options are best for your organization, schedule a demo today.
