SolusGuard

Wearable Panic Button

Developed for people who work alone in the riskiest of situations, the SolusGuard wearable panic button provides the fastest and most reliable way to signal for help.

Key Features

Small & Discrete Wearable Device

Measuring 3.5 cm X 2.8 cm, we provide one of the smallest BlueTooth panic buttons on the market that can be worn multiple ways.

Notify Multiple People of an Emergency Simultaneously

Our panic button allows the wearer to alert co-workers, supervisors and monitoring agents simultaneously through multiple channels.

Automatic Call Placement to 911

Our patented backup call technology allows the panic button to place a 911 call through the wearers phone.

Configurable Sound and Alert Settings

Choose audible or silent alarm modes, who's alerted, the dialed number, and more. Our button adapts to your organization's precise safety protocols

Benefits of a Wearable Panic Button

Help staff feel more confident and safe while working alone or in high-risk situations.

Prevent against escalating tense situations by allowing staff to discretely signal for help.

Decrease response time during emergencies by notifying several people with the press of a button.

Full Feature List

Two device holder options allowing it to be clipped onto clothing or worn as a necklace	✓
Battery level and connection status indicators via the smartphone app	✓

Pricing & Quotes

Our pricing is influenced by three key factors:

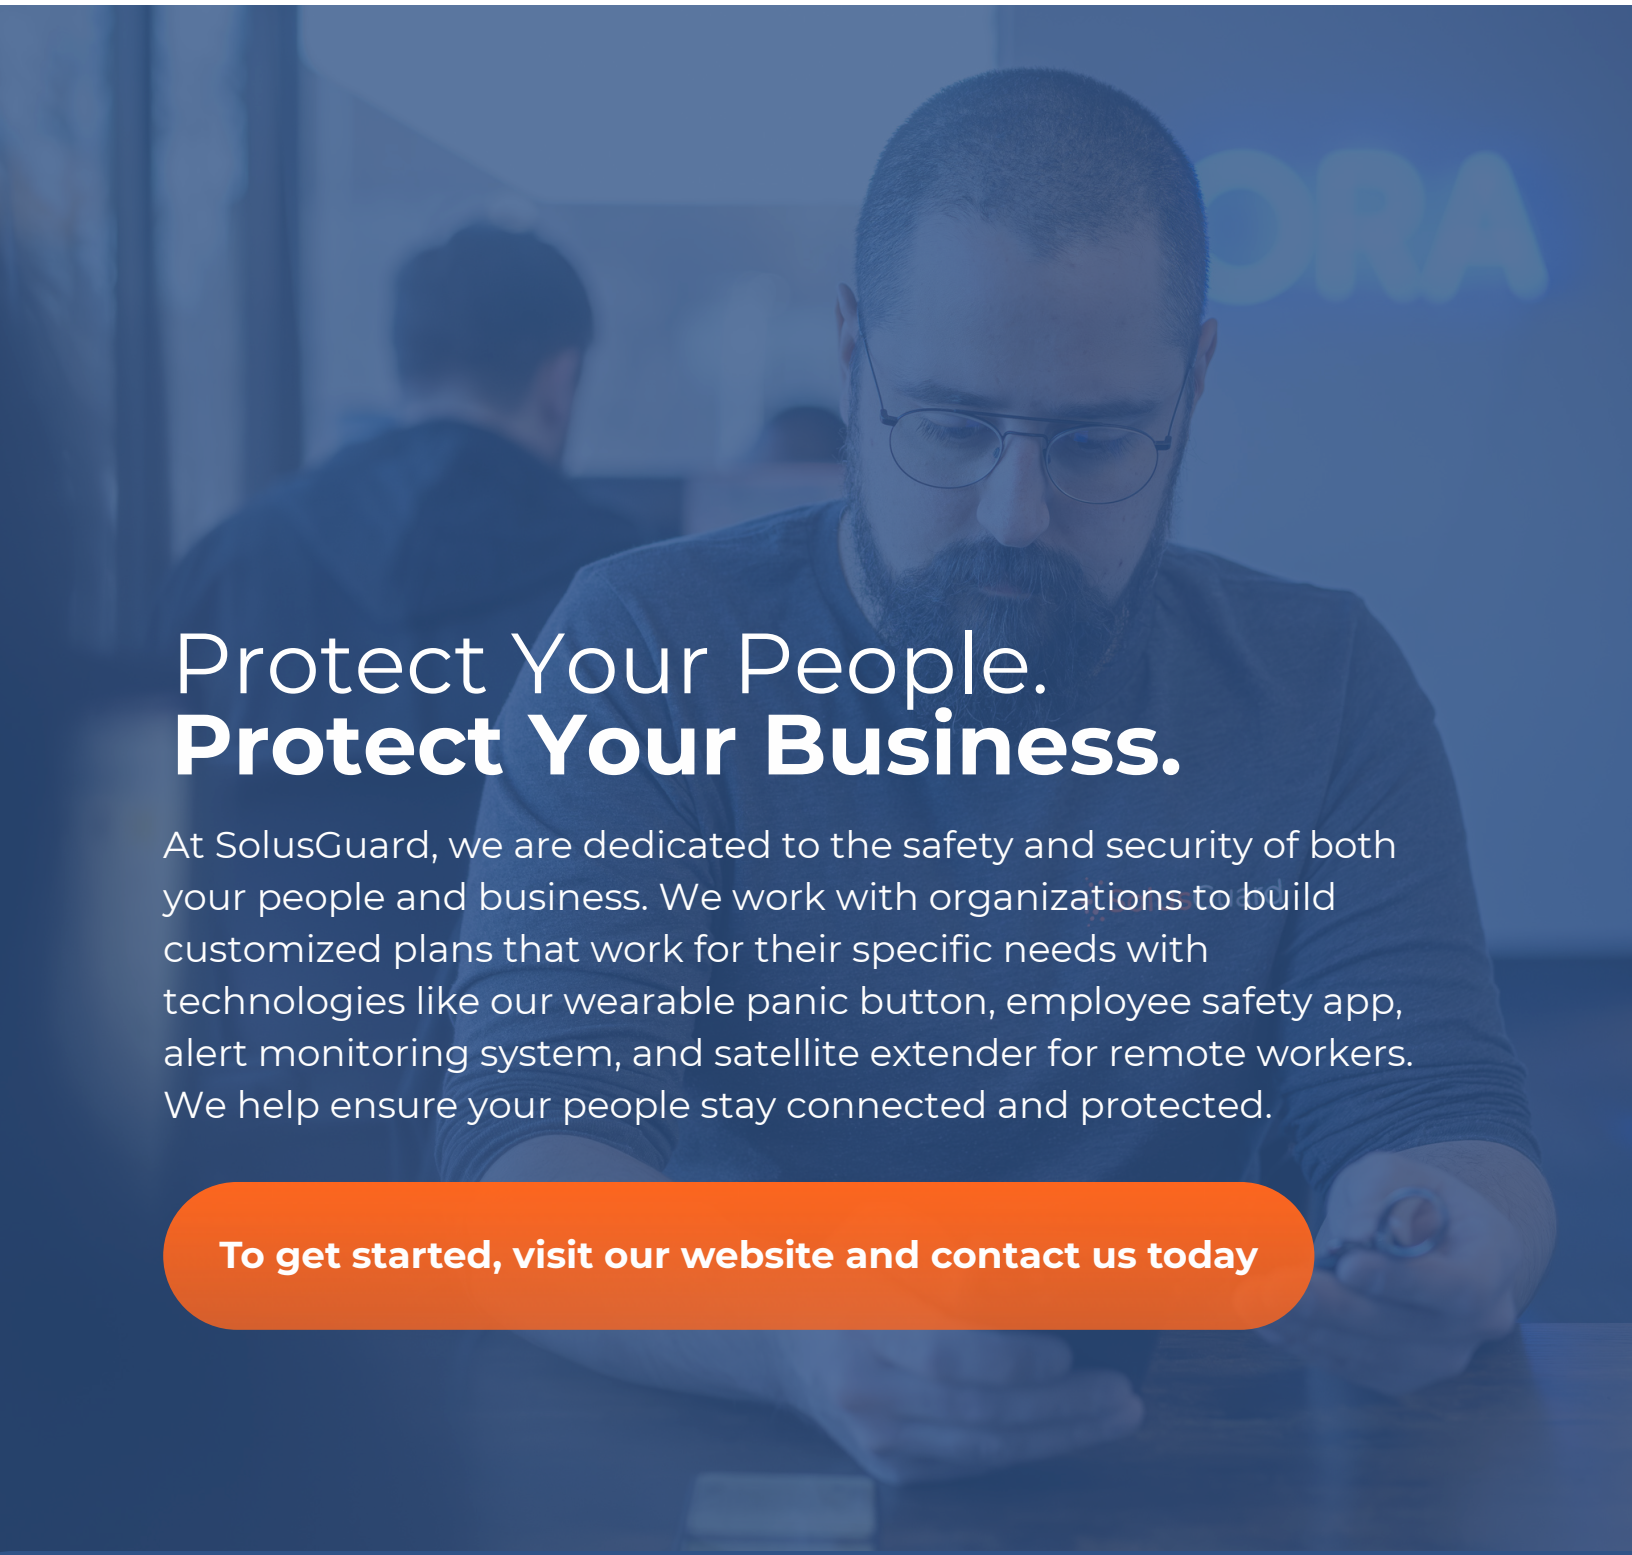

- Number of users – How many people need access to the mobile safety app
- Solutions selected – Panic buttons only, app-based check-ins, or satellite
- Monitoring preferences – Mobile alerts, Command Center (web-based), or 24/7 professional monitoring

Visit our website and contact us so a member of our team can provide you with a quote. If you are unsure what solutions or monitoring options are best for your organization, schedule a demo today.
